

Scheepers Chrysanthemums

FOR THIS SUMMER AND FALL GARDEN BEAUTY

Chrysanthemums rule supreme in all fall gardens. White, pink, yellow, red, lavender, purple as well as the fall colors of bronze and copper can transform the garden to great beauty and charm.

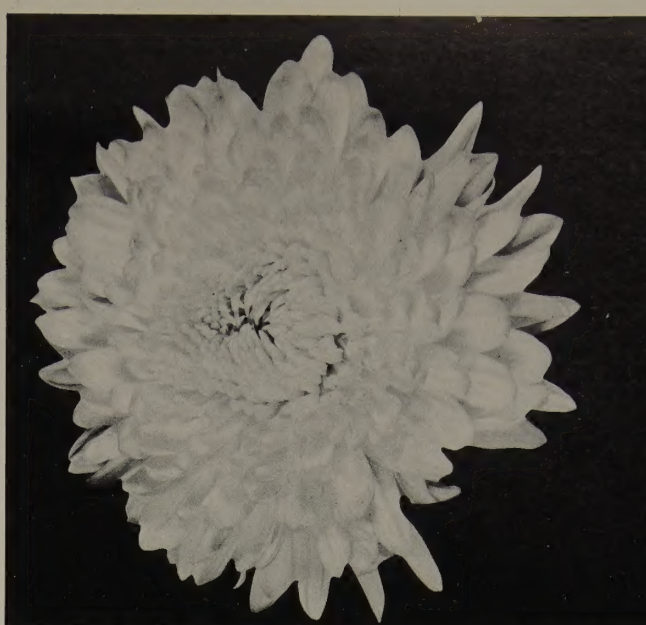

Our list of varieties have been carefully selected. Our pot plants are fully established and will grow with very little care. Yet, they respond with amazing results if given reasonable attention.

They may be planted in the garden where they are to grow and bloom, or, if this is not convenient they may be planted in rows in the cutting garden to be transplanted just as they come into blossom. No loss of plants will be had if handled in this manner.

All varieties listed have good growth habits, are disease resistant, hardy and tolerant of early frosts. they are compact growers with abundance of bloom, but with enough foliage to enhance all their beauty.

Enjoy this garden beauty this summer.

Scheepers Oriental Poppies

(Papaver Orientale)

Oriental Poppies are one of the choicest of perennials. It is one of the most conspicuously beautiful plants of the spring landscape. The fern-like leaves are up in time to enhance the early spring bulbs. Then as the Tulips fade the strong stems of the Poppies will be observed—the bud is unique and beautiful—late May and into June is Poppy time in the garden. While one established plant sends up many blooms it is best to plant in groups of three or five of a variety to fully enjoy the beauty of the vibrant colors.

From August into October is the proper time for planting, as this will give the roots a chance to establish themselves for next season's flowering. Our extra strong heavy plants will give finest effect the first season and they increase in beauty

with each season's growth. Good garden soil is their only requirement; drainage is important so this must be provided for.

They are absolutely hardy in the coldest climates. Once planted in the garden they should be left alone—dig them and divide only after the clumps are so large that they spoil the original effect. Flowers are delightful for indoor decoration—just hold the cut stem over a flame for a few seconds immediately after they are cut—this seals the stem and they stand up well with other flowers in a decoration.

The varieties we have selected in our collection are superb and you may make your selection with complete confidence of having the best.

We send full planting and cultural instructions with each order.
